

Learn Git

Want to learn Git? I've made a simple cheat sheet for you.
Firstly download [Git](#)

Configure Git username	<code>git config --global user.name "Your Name"</code>
Configure Git email	<code>git config --global user.email "hey@domain.co"</code>
Create Repository	<code>git init example</code>
Navigate to directory	<code>cd /Users/Username/example</code>
Add file(s)	<code>git add name.filetype</code>
Commit changes	<code>git commit -m "I committed, yo"</code>
View commits	<code>git log</code>
Connect to repository	<code>git remote add origin https://github.com/username/repo</code>
Push to master	<code>git push -u origin master</code>
Pull the latest copy	<code>git pull origin master</code>
Changes	<code>git diff HEAD</code>
Create a branch	<code>git branch example</code>
Switch to different branch	<code>git checkout branch-name</code>
Remove files	<code>git rm 'example.filetype'</code>

Merge branches (<i>scary!</i>)	git merge example
Delete a branch	git branch -d example
The Daddy Push	git push
