

# Learn Git

Want to learn Git? I've made a simple cheat sheet for you.  
Firstly download [Git](#)

<b>Configure Git username</b>	<code>git config --global user.name "Your Name"</code>
<b>Configure Git email</b>	<code>git config --global user.email "hey@domain.co"</code>
<b>Create Repository</b>	<code>git init example</code>
<b>Navigate to directory</b>	<code>cd /Users/Username/example</code>
<b>Add file(s)</b>	<code>git add name.filetype</code>
<b>Commit changes</b>	<code>git commit -m "I committed, yo"</code>
<b>View commits</b>	<code>git log</code>
<b>Connect to repository</b>	<code>git remote add origin https://github.com/username/repo</code>
<b>Push to master</b>	<code>git push -u origin master</code>
<b>Pull the latest copy</b>	<code>git pull origin master</code>
<b>Changes</b>	<code>git diff HEAD</code>
<b>Create a branch</b>	<code>git branch example</code>
<b>Switch to different branch</b>	<code>git checkout branch-name</code>
<b>Remove files</b>	<code>git rm 'example.filetype'</code>

<b>Merge branches (<i>scary!</i>)</b>	git merge example
<b>Delete a branch</b>	git branch -d example
<b>The Daddy Push</b>	git push
